APPLICATION FOR RESEARCH ETHICS REVIEW

PCU IRIS Form 002B

Sem _____ AY 2023-2024

Checklist

Questions	Yes	No	N/A
1. Does your research involve human participants? If your answer is yes, please answer the sub-questions below.			
1.1 Will the research involve participants below 18 years old or those who are particularly vulnerable or unable to give their informed consent? <i>If yes, please attach a copy of the parental consent.</i> 2.1 Will the research involve online communities (e.g., culling data from social media platforms, online forums and blogs)? <i>If yes, please provide details (e.g., social media platforms, source and type of data to be collected, etc.).</i>			
2. Will your research use documents that are not public domain and, thus, require permission for use from the custodian of such documents? <i>If yes, please provide evidence that permission from the custodian of the data was sought and granted.</i>			
3. Will your research use secondary data (e.g., surveys, inventories, plans, official documents, etc.) from an institution, organisation, or agency that is not in the public domain and, thus, require permission from the custodian of such documents? <i>If yes, please provide evidence that permission to use the data was sought and granted from the custodian of the institution, organizations, or agency.</i>			
4. Does your research involve animals (non-human subjects)?			
5. Does your research involve wildlife?			
6. Does your research involve microorganisms that are infectious, disease-causing or harmful to health?			
7. Does your research involve toxic/chemicals/substances/materials?			
<i>If you answered "yes" to any of the questions 4, 5, 6, and 7, you are required to submit a brief description of the ethical considerations relevant to the specific category. A "yes" answer does not mean approval/disapproval of your research proposal. By providing a more detailed description of the applicable ethical considerations, you will demonstrate your understanding of the potential ethical implications of your research. This will allow the review committee to assess whether you have adequately addressed these concerns and implemented appropriate measures to mitigate any potential harm or risks to participants or other stakeholders.</i>
